
PANTELEIMON EKKEKAKIS

CURRICULUM VITAE

(updated February 13, 2018)

Name: Panteleimon ("Paddy") Ekkekakis
Work Address: Barbara E. Forker Building, Room 253
Department of Kinesiology
Iowa State University
Ames, IA 50011
Phone Number: +1 (515) 294-8766
Fax Number: +1 (515) 294-8740
E-mail Address: ekkekaki@iastate.edu
Personal Web Site: <http://www.ekkekakis.com/>

TABLE OF CONTENTS

Education	2

Conference presentations	38
APPENDIX: Citations in the literature	49
Bibliometric analysis of impact	247
Influence on policy and guideline documents	248

EDUCATION

- 1996-2000 Doctor of Philosophy (Kinesiology), Department of Kinesiology, University of Illinois at Urbana-Champaign, Urbana, Illinois, USA. Dissertation title: "*A dose-response investigation of patterns and correlates of affective responses to acute exercise: The dual-mode hypothesis*". Committee: Steven J. Petruzzello (main advisor), Edward McAuley, Richard A. Washburn, Wendy Heller. Dissertation Abstracts International, Section A: Humanities and Social Sciences, May 2001, Vol. 61 (10-A): 3938. UMI number: 9989986.
- 1993-1996 Master of Science (Kinesiology), Department of Kinesiology, Kansas State University, Manhattan, Kansas, USA. Thesis title: "*The development of an affect scale based on the circumplex model*". Committee: David A. Dzewaltowski (main advisor), Edmund O. Acevedo, Timothy I. Musch.
- 1987-1992 Bachelor of Science (Physical Education and Sport Science), Department of Physical Education and Sport Science, University of Athens, Athens, Greece.
- 1990-1991 Exchange student, School of Human Movement Studies, Faculty of Medicine, University of Liverpool, Liverpool, United Kingdom.

ACADEMIC HONORS AND AWARDS

- 2009-2013 Guest editor, special section of the journal *Psychology of Sport and Exercise* on "Affective responses to exercise"
- 2007- Honorary University Fellow, School of Sport and Health Sciences, University of Exeter, United Kingdom.
http://sshs.exeter.ac.uk/staff/index.php?web_id=Panteleimon_Ekkekakis
- 2006 Iowa State University Award for Early Achievement in Research
- 2005 Elected Fellow of the American College of Sports Medicine (FACSM)
- 2004 Iowa State University, College of Education, "VEISHA Faculty Member of the Year" (nominated and selected by students)
- 2003 Iowa State University, Office of the Provost, Big XII Faculty Fellowship
- 2003 Iowa State University, Department of Health and Human Performance nominee for the "Iowa State University Foundation Award for Early Achievement in Research"
- 2003 Iowa State University, College of Education "Outstanding Early Research Commendation"

- 2003 Biddle Young Scholar Lecture in Exercise Psychology, Fédération Européenne de Psychologie des Sports et des Activités Corporelles (FEPSAC; European Federation for the Psychology of Sport and Physical Activity). July 26, 2003, Copenhagen, Denmark
- 2000 Graduate Student Research Award in Sport and Exercise Psychology, North American Society for the Psychology of Sport and Physical Activity (NASPSPA)
- 2000 Roger Morse Outstanding Graduate Student Award, Department of Kinesiology, University of Illinois at Urbana-Champaign
- 2000 On-Campus Dissertation Research Grant, Graduate College, University of Illinois at Urbana-Champaign
- 1999 Robert L. Sprague Graduate Student Award, College of Applied Life Studies, University of Illinois at Urbana-Champaign
- 1999 Travel award from the University of Wisconsin Health Emotions Research Institute to attend the 5th Annual Wisconsin Symposium on Emotion in Madison, Wisconsin
- 1998 T.K. Cureton Physical Fitness Research Award, Department of Kinesiology, University of Illinois at Urbana-Champaign
- 1990 Erasmus scholarship from the European Union for 9-month study at the University of Liverpool, Great Britain

PROFESSIONAL EXPERIENCE

- 2017-present Professor of exercise psychology, Department of Kinesiology, Iowa State University. Duties: teaching undergraduate and graduate courses in exercise psychology (40%), research (40%), service (20%).
- 2008-2010 Associate professor of exercise psychology, Department of Psychology, University of Crete, Greece. Duties: teaching undergraduate courses in exercise psychology, research methods (I, II, and graduate-level), the psychology of emotion, and special topics in the study of emotions.
- 2006-2017 Associate professor of exercise psychology, Department of Kinesiology, Iowa State University. Duties: teaching undergraduate and graduate courses in exercise psychology (40%), research (40%), service (20%).
- 2000-2006 Assistant professor of exercise and sport psychology, Department of Health and Human Performance, Iowa State University. Duties: teaching undergraduate and graduate courses in exercise and sport psychology (40%), research (40%), service (20%).

- 1996-2000 Graduate assistant, Department of Kinesiology, University of Illinois at Urbana-Champaign. Duties: World-wide web programming and computer network administration.
- 1997 (summer) Graduate assistant and Graduate Research Assistant, Department of Kinesiology, University of Illinois at Urbana-Champaign. Research area: Exercise psychophysiology (EEG, maximal exercise testing).
- 1996 (spring) Graduate teaching assistant, Department of Kinesiology, University of Illinois at Urbana-Champaign. Laboratory taught: Social and psychological foundations of sport and physical activity (undergraduate level).
- 1995 (fall) Graduate research assistant, Department of Kinesiology, Kansas State University. Research area: Exercise psychology, fitness promotion involving high-school and college students.
- 1994, '95 (summer) Graduate research assistant, Department of Kinesiology, Kansas State University. Funded by Easton Aluminum. Research area: Sport psychology, interdisciplinary work with sport biomechanists.
- 1993-1995 Graduate teaching assistant, Department of Kinesiology, Kansas State University. Courses taught: Introduction to Kinesiology, Swimming, Team Sports (undergraduate level); Laboratory taught: Fitness promotion (advanced undergraduate and graduate level).
- 1992-1993 Teaching assistant, Department of Physical Education and Sport Science, University of Athens. Laboratory taught: Motor behavior.
- 1988-1993 Research assistant, Department of Physical Education and Sport Science, University of Athens. Research area: Sport psychology.

TEACHING EXPERIENCE (COURSES DEVELOPED AND TAUGHT)

- KIN 365** "Sport Psychology." Undergraduate course. Psychological factors that influence performance in sport settings. The influence of personality, anxiety, motivation, social factors, and psychological skills training.
- KIN 366** "Exercise Psychology." Undergraduate course. Psychological theories for understanding and predicting health-oriented exercise behavior. Psychological and psychobiological responses to exercise. Psychological interventions for increasing exercise participation and adherence rates.

- KIN 467 / KIN 567** **"Exercise Psychology: Clinical Applications and Interventions."** Dual-listed (advanced-undergraduate and graduate) course. Advanced analysis of theoretical health behavior models and their application to physical activity behavior. Includes practical techniques, tools, and interventions (e.g., counseling skills, motivational interviewing) to enhance exercise prescription and motivation, and considerations for working with special populations.
- KIN 521** **"Advanced Topics in Exercise and Sport Psychology."** Graduate course. Aspects of psychology that form a basis for understanding and explaining behavior in the contexts of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology.
- KIN 590B** **Critical Appraisal for Evidence-Based Practice in Kinesiology.** Critical analysis and interpretation of methodological features of randomized controlled trial (RCTs), systematic reviews, and meta-analyses.
- KIN 620** **Advanced Research Methods in Physical Activity.** Graduate course. Critical analysis of research articles from published literature. Experimental design. Threats to validity. Type I and II errors. Effect size and statistical power. Research ethics.
- PSY 319** **Psychology of Emotion** (University of Crete, Greece). Introduction to the scientific study of emotion, mood, and affect, with emphasis on evolutionary and cultural perspectives.

GRADUATE STUDENT SUPERVISION

- Mark E. Hartman, Ph.D., Iowa State University (2015-present), major professor
- Matthew A. Ladwig, Ph.D., Iowa State University (2015-present), major professor
- Chen Deng, Ph.D., Iowa State University (2015-2018), committee member
- Bruno Smirmaul, Ph.D., São Paulo State University (2015-2016), committee member
- Konstantinos Mantis, Ph.D., Iowa State University (2015-2017), committee member
- Amanda Anderson, Ph.D., Iowa State University (2014-2016), committee member
- Kiraz Candan Herdem, Ph.D., Iowa State University (2016-2017), committee member
- Mark Duncan, M.S., University of Toronto (2014), external examiner
- Yanlong Song, Ph.D., Iowa State University (2014-2017), committee member
- Zack Zenko, Ph.D., Iowa State University (2012-2016), major professor
- Karissa Peyer, Ph.D., Iowa State University (2012-2016), committee member
- Elizabeth Boyer (Hageman), Ph.D., Iowa State University (2012-2015), committee member
- Harsh Buddhadev, Ph.D., Iowa State University (2012-2015), committee member
- Jennifer K. Parker, Ph.D., Iowa State University (2012-present), committee member
- Michael Mackenzie, Ph.D., University of Calgary (2011), external examiner

- Gavin Tempest, Ph.D., University of Exeter and University of South Australia (2008-2012), co-major professor
- Harry Lim, Ph.D., Brunel University (2012), external examiner
- Helga De-Oliveira-Miguel, M.S., Iowa State University (2009-2010), committee member
- Jennifer K. Parker, M.S., Iowa State University (2009-2012), committee member
- Erik Lind, Ph.D., Iowa State University (2002-2008), major professor. First appointment: Assistant Professor, Department of Physical Education, State University of New York (SUNY) College at Oneonta.
- Jennifer E. Lee, Ph.D., University of Iowa (2006-2009), committee member
- Susan Lee Coates, Ph.D., Iowa State University (2002-2008), committee member
- Jenny Smith, M.S., Iowa State University (2006-2009), committee member
- Christy Reed, M.S., Iowa State University (2006-2007), committee member
- Megan E. Holmes, M.S., Iowa State University (2005-2006), committee member
- Elizabeth Byrne, M.S., University of Toronto (2005-2006), committee member
- Emily S. Decker, M.S., Iowa State University (2007-2009), major professor
- Nathan Pick, M.S., Iowa State University (2007-2008), committee member

MEMBERSHIPS IN PROFESSIONAL ORGANIZATIONS

- Fellow of the American College of Sports Medicine (ACSM)
- North American Society for the Psychology of Sport and Physical Activity (NASPSPA)
- European Society for the Psychology of Sport and Physical Activity (FEPSAC)

EDITOR / REVIEWER FOR ACADEMIC JOURNALS AND PUBLISHERS

1. *Research Quarterly for Exercise and Sport* (assoc. editor, psychology section, 2005-11)
2. *Measurement in Physical Education and Exercise Science* (assoc. editor, psychology)
3. *Psychology of Sport and Exercise* (member of the Editorial Board)
4. *Journal of Sport and Exercise Psychology* (member of the Editorial Board)
5. *Mental Health and Physical Activity* (member of the Editorial Board)
6. *Sport, Exercise and Performance Psychology* (member of the Editorial Board)
7. *SAGE Encyclopedia of Sport and Exercise Psychology* (member of the Editorial Board)
8. *International Journal of Sport Psychology*
9. *International Journal of Sport and Exercise Psychology*
10. *The Sport Psychologist*
11. *Journal of Applied Sport Psychology*
12. *Health Psychology*
13. *British Journal of Health Psychology*
14. *Psychology and Health*
15. *Journal of Health Psychology*
16. *Journal of Positive Psychology*
17. *Journal of Psychosomatic Research*

18. *Annals of Behavioral Medicine*
19. *Journal of Behavioral Medicine*
20. *Journal of Personality and Social Psychology*
21. *Psychological Assessment*
22. *Journal of Affective Disorders*
23. *Journal of Psychiatric Research*
24. *Journal of Applied Social Psychology*
25. *Preventive Medicine*
26. *American Journal of Preventive Medicine*
27. *Health Education and Behavior*
28. *International Journal of Obesity*
29. *Journal of Obesity*
30. *Diabetes Research and Clinical Practice*
31. *Perceptual and Motor Skills*
32. *International Journal of Behavioral Nutrition and Physical Activity*
33. *Journal of Physical Activity and Health*
34. *Adapted Physical Activity Quarterly*
35. *Qualitative Research in Sport and Exercise*
36. *Sports Medicine*
37. *Medicine and Science in Sports and Exercise*
38. *British Journal of Sports Medicine*
39. *European Journal of Sport Science*
40. *Scandinavian Journal of Medicine and Science in Sports*
41. *International Journal of Sports Medicine*
42. *European Journal of Applied Physiology*
43. *Journal of Sports Sciences*
44. *Pediatric Exercise Science*
45. *Open Access Journal of Sports Medicine*
46. *Applied Physiology, Nutrition, and Metabolism*
47. *Clinical Physiology and Functional Imaging*
48. *Archives of Physical Medicine and Rehabilitation*
49. *Journal of Experimental Biology*
50. *Journal of Physiology*
51. *Physiology and Behavior*
52. *Hormones and Behavior*
53. *Neuroscience*
54. *Brain Topography*
55. *Psychophysiology*
56. *Biological Psychology*
57. *International Journal of Psychophysiology*
58. *Stress*
59. *American Journal of Psychology*

60. *Canadian Journal of Behavioural Science*
61. *Applied Psychology: An International Review*
62. *Scandinavian Journal of Psychology*
63. *Motivation and Emotion*
64. *Psychology and Psychotherapy*
65. *Psychopharmacology*
66. *Appetite*
67. *Psycho-oncology*
68. *PLoS ONE*
69. *Holcomb and Hathaway Publishers*
70. *Cambridge University Press*
71. *Oxford University Press*

REVIEWER FOR GRANTING AGENCIES

1. Economic and Social Research Council (ESRC), United Kingdom, 2006
2. Medical Research Council (MRC), United Kingdom, 2009 (request declined due to conflict of interest)
3. National Institute on Drug Abuse, Special Emphasis Panel ZDA1 GXM-A (5), "Interactions between physical activity and drug abuse", June 2-3, 2009, Washington, DC.
4. National Institute on Aging, Special Emphasis Panel ZRG1 BBBP-R (50) R, "Science of behavior change" (PAR-10-002), Round 1 Reviewer, June 18, 2010.

GRANT APPLICATIONS

- | | |
|------|--|
| 2017 | "The neural basis of the sense of physical fatigue: New theory, new methodology, and investigation of therapeutic potential." Submitted to the College of Human Sciences / Vice President for Research for the "Bailey Research Career Development Award." Requested \$144,191. Not funded. |
| 2016 | "Brain mechanisms underlying the sense of exertional fatigue." Submitted to the Office of Naval Research, Department of Defense. Not funded. |
| 2016 | "A comparison of affect-based and intensity-based exercise prescriptions for overweight adults." Paid consultant. Dr David M. Williams, School of Public Health, Brown University, PI. Not funded. |
| 2016 | "Affect-based versus intensity-based exercise prescriptions for overweight adults." Paid consultant. Dr David M. Williams, School of Public Health, Brown University, PI. Submitted to the National Cancer Institute in response to PA13-302 (R01 CA200927). Requested: \$3,734,935. Impact Score:28, Percentile:15. Not funded. |

- 2015 "During-exercise versus post-exercise affect: Effects on future exercise behavior." Paid consultant. Dr David M. Williams, School of Public Health, Brown University, and Austin S. Baldwin, Department of Psychology, Southern Methodist University, PI. Submitted to the National Cancer Institute in response to PAR14-067 (U01 CA193431). Requested: \$2,630,267. Priority score: 21. Not funded.
- 2015 "Biobehavioral effects of a 12-week self-paced RCT walking program in obese, sedentary women with type 2 diabetes." Paid consultant. Submitted to the National Heart, Lung, and Blood Institute (NHLBI) as R01. Cynthia Fritschi (University of Illinois Chicago, Department of Biobehavioral Health Science), PI. Not funded.
- 2015 "Improving the experience of exercise for obese women." Paid consultant. Submitted to the British Heart Foundation, New Horizons program. Costas I. Karageorghis (Department of Life Sciences, Brunel University London), PI. Not funded.
- 2015 "Is post-exercise overeating a compensatory behaviour for perceived unpleasant effects of exercise?" Principal Investigator, with Joanne Hudson, Kevin Deighton, Lauren Duckworth, Susan Backhouse. Leeds Beckett University. £8,529 (approx. \$12,160). **Funded.**
- 2015 "Effects of competition of affective responses to exercise and exercise performance." Primary Investigator with Zack Zenko, Ph.D. student. Center for Advanced Hindsight, Duke University. \$4,549. **Funded.**
- 2015 "Making exercise more pleasant for sedentary people with obesity." Doctoral Student Research Grant, American College of Sports Medicine Foundation. Zack Zenko, PI; Panteleimon Ekkekakis, Mentor. \$4,538. **Funded.**
- 2015 "FSI Fellowship for Kinesiology." Contract with Force Science Institute (FSI) to fund the doctoral studies of Mark Hartman, 2015-2019. \$120,000. **Funded.**
- 2014 "Evidence-Based Practice Project for KIN 366: Exercise Psychology." Graduate Student Teaching-as-Research grant. Iowa State University Graduate College, Center for Excellence in Learning and Teaching (CELT), and Center for Integration of Research, Teaching and Learning (CIRTL). \$1,250. **Funded.**
- 2014 "Applying behavioral economics to improve exercise adherence in the obese." Predoctoral Fellowship, Zack Zenko, PI; Panteleimon Ekkekakis, Mentor. American Heart Association, Midwest Affiliate. \$52,000. Not funded.
- 2014 "Questioning the basic assumption behind current exercise promotion efforts: Do people make exercise choices rationally?" Zack Zenko, PI; Panteleimon Ekkekakis, Mentor. Graduate Student Research Study Project Award, Midwest Regional Chapter of the American College of Sports Medicine. \$500. **Funded.**

- 2014 "Affective responses to exercise, evaluations, and forecasts." Primary Investigator, with Zack Zenko, Ph.D. student. Center for Advanced Hindsight, Duke University. \$5,000. **Funded.**
- 2013 "Making exercise integral to player performance in virtual reality fitness games." Co-investigator with Drs Joseph LaViola (PI) and Theodore Angelopoulos of the University of Central Florida. Submitted to the National Heart, Lung, and Blood Institute (NHLBI) in response to PA-11-212, Virtual Reality Technologies for Research and Education in Obesity and Diabetes (R21). ISU subcontract \$24,434. Not funded.
- 2012 "The neural basis of the sense of fatigue: New theory, new methodology, and investigation of therapeutic potential." Sole Primary Investigator. Submitted to the office of the Vice Provost for Research and Economic Development, Iowa State University, as a Bailey Research Career Development Award. \$150,000. Not funded.
- 2012 "The experience of Yoga: A mixed methods neurophenomenological approach." Co-investigator with Dr Nicole Culos-Reed, PI, of the University of Calgary. Submitted to the Social Sciences and Humanities Research Council of Canada as an Insight Development Grant. \$47,891, 2012-2014. Not funded.
- 2012 "Why exercise? Motivational contingency management and health outcomes." Paid consultant. Drs Michael Otto of Boston University and Jasper Smits of Southern Methodist University, PIs. Submitted to the National Heart, Lung, and Blood Institute (NHLBI) in response to PAR-10-005 ("NHLBI Clinical Trial Pilot Studies, R34"). Not funded.
- 2011 & 2012 "Modifying exercise-related affect to alter physical activity habits." Co-investigator with Drs Austin Baldwin and Jasper Smits of Southern Methodist University. Submitted to the National Cancer Institute in response to RFA-CA-11-012 ("Research Answers to NCI's Provocative Questions, R21"). Not funded.
- 2011 "Exercise for mood enhancement." Paid consultant. Dr Jasper Smits of Southern Methodist University and Bess Marcus of Brown University, PIs. Submitted to the National Heart, Lung, and Blood Institute (NHLBI) in response to PAR-10-005 ("NHLBI Clinical Trial Pilot Studies, R34"). Not funded.
- 2011 "Distress intolerance in overeating and under-exercise: Intervention development." Co-investigator with Drs Michael Otto of Boston University and Jasper Smits of Southern Methodist University. Submitted to the National Heart, Lung, and Blood Institute in response to PA-11-063 ("Translating basic behavioral and social science discoveries into interventions to improve health-related behaviors, R01"). Requested \$2,500,000 (Direct costs). Not funded.

- 2008 "The role of the affect heuristic in the decision to engage in physical activity behavior" (Co-investigator with Dr Amy S. Welch). Submitted to the United States Department of Agriculture (USDA) as a subcontract of 2008-34115-19372 ("Human Nutrition, IA", \$867,715). \$40,000 for Year 1, \$50,000 for Year 2. **Funded**.
- 2008 "Impact of vigorous interval exercise on affective responses in normal weight and obese adults." Paid Consultant. Marcus Kilpatrick (University of South Florida), PI. Submitted to the American Heart Association. Not funded.
- 2007 "Taking a first peek into the frontal cortex during exercise using near infrared spectroscopy: A comparison of the transient hypofrontality and dual-mode theories" (Co-investigator with Dr Amy S. Welch). Submitted to the Iowa State University College of Human Sciences as a Seed Grant. Requested \$4,000. **Funded**.
- 2007 "PREPARE: Progressive Resistance Exercise to Promote Activity in Rural Elderly" (Co-investigator with Drs Franke, Kohut, Martin, and Russell). Submitted to the National Institute of Aging. Requested \$275,000 (Direct costs). Not funded.
- 2007 "Clinical gait assessment program" (Co-investigator with Drs Smiley-Oyen, Derrick, Gillette, and Franke). Submitted to the Iowa State University, College of Human Sciences Entrepreneurial Initiatives program. Requested \$45,000. **Funded**.
- 2006 "Concept: Stress, cytokines and heart disease in police" (Co-investigator with Drs Franke, Kohut, and Russell). Submitted to the National Institute for Occupational Safety and Health and Centers for Disease Control and Prevention. Requested \$196,987 (Direct costs). **Funded**, R21 OH008270.
- 2005 "Latino college student physical activity and eating patterns" (Paid Consultant; Xiaofen Keating, PI). Submitted to the National Institute of General Medical Sciences in response to PAR-04-001 ("MBRS Support of Continuous Research Excellence, SCORE"). Not funded.
- 2005 "Stress, mediators of inflammation, and law enforcement" (Co-Investigator with Drs Franke, Kohut, and Russell). Submitted to the National Institutes of Health in response to PA 05-027 ("Research on mind-body interactions and health"). Requested \$1,100,000. Not funded.
- 2004 "Physical activity intensity, affect, and adherence" (Principal Investigator). Submitted to the National Cancer Institute in response to RFA CA-04-009 ("Mechanisms of physical activity behavior change"). Requested \$200,000 (direct costs). Not funded.

- 2003 "Inflammatory mediators and stress in cardiovascular disease" (Co-Investigator with Drs Franke, Kohut, and Russell). Submitted to the National Institutes of Health, Office of Behavioral and Social Sciences Research, in response to RFA OD-03-008 ("Research on mind-body interactions and health"). Requested \$300,000 (direct costs). Not funded.
- 2003 "Stress, mediators of inflammation, and law enforcement" (Co-Investigator with Drs Franke, Kohut, and Russell). Submitted to the National Institute for Occupational Safety and Health in response to program announcement PA-99-143 ("Occupational safety and health research"). Requested \$300,000 (direct costs). Not funded.
- 2003 "Affect and physical activity in sedentary adults" (Principal Investigator). Submitted to the National Institute of Mental Health as a "Behavioral Science Track Award for Rapid Transition - B/START" (PAR-00-119). Requested \$50,000 (direct costs). Priority Score 153. **Funded**, RO3 MH069724.
- 2003 "Energy expenditure and the response to stress in obese adolescents: implications for the pubertal metabolic syndrome" (Co-investigator with Drs Eisenmann, Franke, and Alekel). Submitted to the Center for Designing Foods to Improve Nutrition (CDFIN), Iowa State University. Requested \$32,575. **Funded**.
- 2002 "Job-related stress and CVD in law enforcement officers" (Co-investigator with Drs Franke, Chadwick, and Shelley). Submitted to the National Institute for Occupational Safety and Health in response to program announcement PA-99-143. Requested \$125,000 (direct costs). Not funded.
- 2002 "Pilot Phase of Project PASERS (Physical Activity Self-Regulation Strategies): Toward an improved interdisciplinary method for self-monitoring and self-regulating exercise intensity" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a Special Equipment Grant. Requested \$18,000. **Funded**.
- 2002 "Pilot Phase of Project PASERS (Physical Activity Self-Regulation Strategies): Toward an improved interdisciplinary method for self-monitoring and self-regulating exercise intensity" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a University Research Grant (URG). Requested \$18,000. Not funded.
- 2002 "Does exercise and relaxation training moderate cardiovascular reactivity in older adults?" (PI). Submitted to the Research Institute for Studies in Education, College of Education, Iowa State University, as a Research Incentive Grant. Requested \$1,000. **Funded**.

- 2001 "Further development of a dual-mode model of affective responses to acute exercise" (PI). Submitted to the College of Education, Iowa State University, for a summer salary support grant. Requested: 6-week summer salary. **Funded.**
- 2001 "Self-selected exercise intensity and affective responses: The role of metabolic processes, individual differences, and self-efficacy" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a Special Research Initiation Grant (SPRIG). Requested \$16,110. **Funded** (\$12,610 from the Provost's Office, \$1,600 from the Department of Health and Human Performance, \$1,500 from the College of Education).
- 2001 "Disciplines and professions in health and human performance: An integrated foundation course to enhance undergraduate instruction" (Co-investigator with Gregory Welk, Carol Cordell, and Mary Ellen Wishart). Submitted to the Center for Teaching Excellence, Iowa State University, as a Miller Faculty Fellowship. **Funded.**
- 2001 "Self-selected exercise intensity and affective responses: The role of metabolic processes, individual differences, and self-efficacy" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a University Research Grant (URG). Requested: \$18,000. Not funded.
- 2000 "Iowa's Trial of Activity for Adolescent Girls (TAAG)" (Co-investigator with Drs Katherine Thomas, Warren Franke, Rick Sharp, and Jerry Thomas). Submitted to the National Heart, Lung, and Blood Institute (NHLBI). Requested: \$2,891,105. Not funded.
- 2000 "Individual differences in preference for different levels of exercise intensity" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a Special Research Initiation Grant (SPRIG). Requested \$16,860. Not funded.
- 2000 "Toward improved self-regulation of exercise intensity in novice exercisers: A dimensional exploration of the language of strenuous exercise" (PI). Submitted to the Office of the Vice Provost for Research and Advanced Studies, Iowa State University, as a Science, Technology, and Society Grant (STSG). Requested \$5,000. Not funded.
- 2000 "Toward a dual-mode hypothesis of affective responses to acute exercise" (PI). Submitted to the College of Education, Iowa State University, for a summer salary support grant. Requested: 6-week summer salary. **Funded.**

- 1999 "Network-based laboratory modules for the study of movement biomechanics, and coordination and control" (Co-author with Drs John W. Chow and Les G. Carlton). Submitted to the National Science Foundation, Division of Undergraduate Education (Course, Curriculum, and Laboratory Improvement - Educational Materials Development). Requested: \$292,526. Not funded.
- 1999 "ActToday: Development and pilot testing of a web-based physical activity diary program" (Co-author with Drs Weimo Zhu and Richard A. Washburn). Submitted to the University of Illinois at Urbana-Champaign Research Board. Requested \$13,634. Not funded.
- 1998 "Aerobic exercise intensity and affect: the dual-mode model" (Author). Submitted to the American College of Sports Medicine Foundation. Requested: \$5,000. Not funded.
- 1998 "Further development of a web-based digitized video image system for the study of biomechanics and motor coordination" (Co-author with Drs John W. Chow and Les G. Carlton). Submitted to the University of Illinois at Urbana-Champaign Educational Technologies Board. Requested: \$6,500. **Funded:** \$6,500.
- 1997 "The dose-response relationship in exercise-associated affective changes" (Co-author with Dr Steven J. Petruzzello). Submitted to the University of Illinois at Urbana-Champaign Research Board. Requested: \$16,528. **Funded:** \$9,405.
- 1997 "The dose-response relationship in acute aerobic exercise-induced affective changes: A theory-based psychophysiological investigation" (Author). Submitted to the Life Fitness Research Foundation. Requested: \$2,500. Not funded.
- 1997 "WWW-based instructional resources for the study of the social and psychological aspects of physical activity" (Co-author with Dr Steven J. Petruzzello). Submitted to the University of Illinois at Urbana-Champaign Educational Technologies Board. Requested: \$6,685. **Funded:** \$2,500.

NEWS COVERAGE OF RESEARCH

Reuters Health, New York Times, Wall Street Journal, Washington Post, New York Newsday, Health and Human Services Healthbeat, Corriere della Sera (Italy), The Guardian, Runner's World, Smithsonian, Elle, Allure, Health, Prevention, Shape, Self, Oprah Magazine, Dr Oz The Good Life, Better Homes and Gardens, Weight Watchers magazine, First for Women, IDEA Fitness Journal, Men's Health, Chatelaine (Canada), Medical Post (Canada), Des Moines Register, Ames Tribune, Iowa State Daily.

INVITED LECTURES

- December 14, 2017 "Physical exercise as an antidepressant: how does it work?" Invited lecture. Conference entitled "Aging and Depression: From the fear of falling to the fear of living." Bologna, Italy.
- December 13, 2017 "Physical activity and public health messaging: Lessons from the recent revival of the intensity debate." Invited seminar. Institute for Sport, Physical Education and Health Sciences, University of Edinburgh, Edinburgh, Scotland.
- December 12, 2017 "Exercise hedonics: Pleasure-displeasure responses to exercise and their implications for exercise behavior." Keynote lecture, British Psychological Society, Division of Sport and Exercise Psychology. Glasgow, Scotland.
- May 20, 2017 "Exercise and obesity: A look at professional practice norms from the perspective of psychological hedonism." Keynote lecture. International Symposium on Affective Responses to Exercise. Recife, Brazil.
- May 20, 2017 "Near-infrared spectroscopy (NIRS)." Keynote lecture. International Symposium on Affective Responses to Exercise. Recife, Brazil.
- May 19, 2017 "Measuring affective responses to exercise." Keynote lecture. International Symposium on Affective Responses to Exercise. Recife, Brazil.
- May 19, 2017 "Exercise hedonics: Pleasure-displeasure responses to exercise and their implications for exercise behavior." Keynote lecture. International Symposium on Affective Responses to Exercise. Recife, Brazil.
- May 18, 2017 "The search for brain mechanisms of the sense of exertional fatigue." Departmental seminar. Department of Physiotherapy. Universidade Federal de Pernambuco. Recife, Brazil.
- April 13, 2017 "Exercise hedonics: Pleasure-displeasure responses to exercise and their implications for exercise behavior." Kevser Ermin Memorial Lecture, Department of Health, Exercise Science, and Recreation Management, University of Mississippi. Oxford, Mississippi.
- November 29, 2016 "The search for brain mechanisms of the sense of exertional fatigue." Departmental seminar. Department of Psychology. University of Lille 3, Lille, France.

- November 28, 2016 "Near-infrared spectroscopy." Departmental seminar. Department of Psychology. University of Lille 3, Lille, France.
- November 25, 2016 "Measuring affective responses to exercise." Departmental seminar. Department of Psychology. University of Lille 3, Lille, France.
- November 22, 2016 "Exercise hedonics: Pleasure-displeasure responses to exercise and their implications for exercise behavior." Invited keynote lecture, conference entitled "Motor Behavior and emotion: Cognitive and affective factors that impact motor control." University of Lille 3, Lille, France.
- June 15, 2016 "Exercise-is-Medicine meets Evidence-Based-Medicine: Learning to critically appraise Randomized Controlled Trials (RCTs) in the time of bias." Pre-conference workshop. North American Society for the Psychology of Sport and Physical Activity. Montreal, Quebec, Canada.
- May 5, 2016 "Exercise hedonics: Pleasure-displeasure responses to exercise and their implications for exercise behavior." Invited keynote lecture, Zeigler Research Forum, College of Nursing and Health Sciences, University of Vermont. Burlington, Vermont.
- February 27, 2016 "For exercise to be effective as antidepressant therapy, patients must do it: Insights from contemporary exercise psychology research." Invited lecture. Genova, Italy.
- February 26, 2016 "Physical exercise as a therapeutic agent: A critical appraisal." Invited lecture. 20th National Congress of the Italian Society of Psychopathology. Milan, Italy.
- December 15, 2015 "Pleasure and displeasure in response to exercise: Dose-response patterns, mechanisms, and implications for exercise behavior." Invited lecture. Bologna, Italy.
- December 14, 2015 "Affective responses to physical exercise: From experiments to guidelines." Roundtable entitled "Chronic cardiac pathology and major depression: Combined interventions for complex patients." Emilia Romagna Regional Health Service. Modena, Italy.
- December 8, 2015 "With the highest scientific standards? Guide to critical appraisal of systematic reviews and meta-analyses of exercise as medicine." Invited departmental seminar. School of Sport and Education, Brunel University. London, United Kingdom.

- December 1, 2015 "Exercise prescription as an essential challenge to our disciplinary coherence: The long struggle to affix a third leg to the stool." Invited lecture, annual conference, British Association of Sport and Exercise Sciences. Burton upon Trent, Staffordshire, United Kingdom.
- November 30, 2015 "Critical appraisal in the time of bias: Learning to read an article several layers deep." Departmental seminar, School of Sport, Leeds Beckett University. Leeds, United Kingdom.
- November 10, 2015 "Pleasure and displeasure in response to exercise: Dose-response patterns, mechanisms, and implications for exercise behavior." Invited lecture, University of Potsdam. Potsdam, Germany.
- November 5-6, 2015 "Critical appraisal in the time of bias: Learning to read an article several layers deep." Invited doctoral workshop. Department of Nutrition, Exercise and Sports, University of Copenhagen. Copenhagen, Denmark.
- October 8, 2015 "Lessons I've learned from my first 25 years of publishing research in exercise science: The good, the bad, and the ugly." Invited lecture, National Taiwan Sport University, Taipei, Taiwan.
- October 7, 2015 "Pleasure and displeasure in response to exercise: Dose-response patterns, mechanisms, and implications for exercise behavior." Invited lecture, National Taiwan Normal University, Taipei, Taiwan.
- July 15, 2015 "Escape from cognitivism: Exercise as hedonic experience." Keynote lecture, 14th European Congress of Sport Psychology, European Federation of Sport Psychology. Bern, Switzerland.
- July 14, 2015 "Critical appraisal in the time of bias: Learning to read an article several layers deep." Pre-congress workshop, 14th European Congress of Sport Psychology, European Federation of Sport Psychology. Bern, Switzerland.
- April 10, 2015 "Welcome to the ball, Cinderella: Kinesiology, the Brave New World of Evidence-Based Medicine, and the unforeseen challenge of critical appraisal." Invited departmental colloquium presentation. Department of Kinesiology and Community Health, University of Illinois at Urbana-Champaign. Urbana, Illinois.
- February 13, 2015 "Exercise-is-Medicine meets Evidence-Based Medicine: How prepared is exercise science for the rough-and-tumble reality of EBM?" Invited doctoral seminar presentation. School of Health, Physical Education and Recreation, University of Nebraska Omaha.

- February 5, 2015 "Hey, young kinesiologist, you want a Nobel Prize? Solve the enigma of fatigue!" Invited seminar presentation. Department of Human Performance, Minnesota State University, Mankato, Minnesota.
- October 20, 2014 "Hey, young kinesiologist, you want a Nobel Prize? Solve the enigma of fatigue!" Invited seminar presentation. Department of Kinesiology, McMaster University. Hamilton, Ontario, Canada.
- October 20, 2014 "Measuring affective responses to exercise." Invited seminar presentation. Department of Kinesiology, McMaster University. Hamilton, Ontario, Canada.
- October 18, 2014 "Blood, sweat, and tears in a cognitivist world: Travails of an exercise hedonist (and why you should be one too)." Keynote lecture in Exercise and Sport Psychology, Conference of the Canadian Society for Psychomotor Learning and Sport Psychology (SCAPPS). London, Ontario, Canada.
- October 16, 2014 "Hey, young kinesiologist, you want a Nobel Prize? Solve the enigma of fatigue!" Invited seminar presentation. School of Kinesiology, Western University. London, Ontario, Canada.
- July 9, 2014 "What's old is new again: The rediscovery of the motivational properties of pleasure in post-cognitivist exercise psychology." Divisional keynote lecture, 28th International Congress of Applied Psychology, International Association of Applied Psychology. Paris, France.
- June 13, 2014 "The reemergence of hedonism in post-cognitivist exercise psychology: Preparing for the field's first veritable paradigmatic transition." Keynote lecture. Annual conference of the North American Society for the Psychology of Sport and Physical Activity. Minneapolis, Minnesota.
- May 29, 2014 "Ratings of pleasure-displeasure as the emerging third pillar of exercise prescription." Tutorial lecture. Annual meeting of the American College of Sports Medicine. Orlando, Florida.
- May 28, 2014 "Physical activity for the treatment of depression: The challenge of critically appraising the evidence." Tutorial lecture. Annual meeting of the American College of Sports Medicine. Orlando, Florida.
- May 13, 2014 "Exercise psychology according to Jillian and Bob: A look at professional practice norms from the perspective of psychological hedonism." Invited seminar presentation. Physical Activity for Health Research Centre, University of Edinburgh, Edinburgh, Scotland.

- May 12, 2014 "Walking and affective response. Part II. Research results." Invited presentation. "Walking for well-being" workshop, organized by the Scottish Universities Insight Institute. Strathclyde University, Glasgow, Scotland.
- May 12, 2014 "Walking and affective response. Part I. Measuring affect." Invited presentation. "Walking for well-being" workshop, organized by the Scottish Universities Insight Institute. Strathclyde University, Glasgow, Scotland.
- February 21, 2014 "Exercise psychology according to Jillian and Bob: A look at professional practice norms from the perspective of psychological hedonism." Keynote lecture. Association for Applied Sport Psychology North Central Regional Conference. Mankato, Minnesota.
- July 17, 2013 "TREAD-UK: The fascinating tale of an NHS guideline, physical activity, depression, a press release, and a million pounds of taxpayers' money." Invited departmental seminar. School of Sport and Education, Brunel University. London, United Kingdom.
- October 27, 2012 "The resurrection of psychological hedonism: The motivational implications of exercise-induced pleasure and displeasure." Keynote lecture. PRACTICE Conference. Lisbon, Portugal.
- June 23, 2012 "The sense of fatigue as an exemplar of Cannon's 'wisdom of the body' and Leder's 'bodily dys-appearance.'" Keynote lecture. Conference entitled "The absent presence of the body in social sciences, art, education and health sciences: Methodological issues and new perspectives." Rethymnon, Greece.
- June 20, 2012 "The pleasure and displeasure people feel when they exercise at different intensities: Psychobiological mechanisms and implications for fatigue." Invited departmental seminar. School of Sport and Education, Brunel University. London, United Kingdom.
- July 1, 2011 "Mens sana: What has modern science shown about the relationship between physical activity and brain health?" Invited lecture. Rethymnon chapter of the Hellenic Society for Alzheimer's Disease and Related Disorders. Rethymnon, Greece.
- March 14, 2011 "The pleasure and displeasure people feel when they exercise: Theory development, neural basis, and motivational implications." Invited lecture. Department of Exercise Science, Elon University. Elon, North Carolina.

- September 13, 2010 "Can public health take the HIT?" Invited lecture. Uniformed Services University (USU) Consortium for Health and Military Performance (CHAMP) symposium on High-intensity Interval Training (HIT). Washington, DC (via teleconference).
- May 4, 2010 "The pleasure and displeasure people feel when they exercise: Methods, theory, and mechanisms." Invited lecture. Department of Physical Education and Sport Science, University of Thessaly, Greece.
- May 4, 2010 "Why is it so hard? A hedonic perspective on exercise behavior and adherence." Invited lecture. Department of Physical Education and Sport Science, University of Thessaly, Greece.
- October 9, 2009 "The pleasure and displeasure people feel when they exercise: Methods, theory and implications for exercise prescription and adherence." Invited seminar presentation. School of Sport and Exercise Sciences. University of Birmingham, Great Britain.
- October 9, 2009 "Why is it so hard? A hedonic perspective on the challenge of exercise adherence in obesity." Invited keynote lecture. Conference of the British Association for Cardiac Rehabilitation. Birmingham, Great Britain.
- October 8, 2009 "The pleasure and displeasure people feel when they exercise: Methods, theory and implications for exercise prescription and adherence." Invited keynote plenary lecture. Conference of the British Association for Cardiac Rehabilitation. Birmingham, Great Britain.
- September 24, 2009 "Acute exercise and affective responses: Theory to practice." British Association of Sport and Exercise Sciences Workshop, entitled "Acute exercise and psychological outcomes: Concepts, methods and implications for research and practice." University of Exeter, Great Britain.
- December 14, 2008 "Pleasure and displeasure responses to exercise: The long road from dualism to functional duality through the dual-mode theory." Plenary lecture. 10th National Congress on Sport Psychology, organized by the Hellenic Society of Sport Psychology. Athens, Greece.
- December 12, 2008 "Physical exercise as a buffer in the relationship between stress and pathogenesis." Four-hour lecture to the "Stress Management" graduate course at the University of Athens Medical School (directed by George P. Chrousos). Athens, Greece.

- October 9, 2007 "Pleasure and displeasure responses to exercise: Theoretical underpinnings and implications for addressing the epidemic of physical inactivity." Workshop on "Pleasure" organized by Professor Michel Cabanac (Université Laval, Canada). Lanzarote, Canary Islands, Spain.
- October 5, 2007 "Affective responses to acute exercise: Theoretical underpinnings and implications for exercise prescription." Departmental Seminar. School of Sport and Exercise Sciences, Loughborough University, Great Britain.
- October 3, 2007 "Affective responses to acute exercise: Theoretical underpinnings and implications for exercise prescription." Departmental Seminar. School of Sport and Health Sciences, University of Exeter, Great Britain.
- September 28, 2007 "Acute exercise and affective responses: Theory to practice." British Association of Sport and Exercise Sciences Workshop, entitled "Acute exercise and psychological outcomes: Concepts, methods and implications for research and practice." University of Exeter, Great Britain.
- September 26, 2007 "Affective responses to physical activity: Implications for mental health practice." Mood Disorders Interest Group, Department of Psychology, University of Exeter, Great Britain.
- June 11, 2007 "Which exercise intensities make us feel good and which do not? A personal retrospective of 15 years of methodological and theoretical pursuits." Department of Physical Education and Sport Science, University of Athens. Athens, Greece.
- December 18, 2006 "Health-oriented exercise prescription: A psychophysiological approach." Department of Physical Education and Sport Science, University of Athens. Athens, Greece.
- December 18, 2006 "The scientific publication process." Department of Physical Education and Sport Science, University of Athens. Athens, Greece.
- June 3, 2004 "If exercise makes people feel better, then why aren't more people active? Maybe it's not that simple after all". Keynote lecture in feature session entitled "The psychology of exercise intensity." Annual meeting of the American College of Sports Medicine. Indianapolis, Indiana.
- March 18, 2004 "Exercise intensity and affect: Clues for understanding dropout". Laboratory of Nutrition and Clinical Dietetics, Harokopion University of Athens. Athens, Greece.

- October 20, 2003 "If exercise makes people feel better, why aren't more people active? Clues from the first 30 years of research on the relationship between exercise intensity and affective responses." Department of Health, Exercise, and Sport Sciences, Texas Tech University. Lubbock, Texas.
- July 22, 2003 "Theoretical integration in the study of affective responses to acute exercise: The dual-mode model". Biddle Young Scholar Lecture in Exercise Psychology, Fédération Européenne de Psychologie des Sports et des Activités Corporelles (FEPSAC; European Federation for the Psychology of Sport and Physical Activity). July 26, 2003, Copenhagen, Denmark.
- March 20, 2003 "The relationship of physical activity, mood, and mental health". Iowa State University Extension via the statewide Iowa Communications Network (ICN). Session entitled "Current research on family mental health issues," part of the Iowa Rural Mental Health Initiative.
- December 10, 2002 "Pleasure and displeasure responses to physical activity in humans: Developing an evolutionary framework." Invited seminar presentation. Department of Biology. Grinnell College. Grinnell, Iowa.
- October, 24, 2002 "'No pain, no gain' or 'Easy does it'? What have we learned about the relationship between exercise intensity and affective responses after 30 years of research?" Laboratory of Nutrition and Clinical Dietetics, Harokopion University of Athens. Athens, Greece.
- October 23, 2002 "Graduate studies in exercise science in the United States of America." Department of Physical Education and Sport Science, University of Athens. Athens, Greece.
- October 22, 2002 "Intensity of acute exercise and affective responses: Theory and application". Department of Physical Education and Sport Science, University of Athens, Athens, Greece.
- March, 24, 2001 "Why doesn't Johnny like to run?" Iowa State University College of Education Research Exchange. Ames, Iowa.

CONFERENCE PRESENTATIONS

1. **Ekkekakis, P.** (2017, July). *Dances with wolves: If exercise becomes medicine, how might the medicines respond?* Paper presented at the 14th International Society of Sport Psychology World Congress. Seville, Spain.
2. Jones, L., & **Ekkekakis, P.** (2017, July). *Is deeper, better? Psychological and psychophysiological effects of immersive technology during exercise.* Paper presented at the

- 14th International Society of Sport Psychology World Congress. Seville, Spain.
3. **Ekkekakis, P.** (2017, July). *Preparing exercise psychology for its postcognitivist future: Reestablishing the role of affect within dual-process models of human behavior*. Paper presented at the 14th International Society of Sport Psychology World Congress. Seville, Spain.
 4. Brand, R., & **Ekkekakis, P.** (2017, May). *Affective-reflective theory of physical inactivity*. Paper presented at the 49th annual conference of the German Society for Sport Psychology. Bern, Switzerland.
 5. **Ekkekakis, P.** (2017, June). *Exercise psychology at 50: From wide-eyed radical cognitivist to nuanced dual-process theorist*. Paper presented at the annual conference of the North American Society for the Psychology of Sport and Physical Activity. San Diego, California.
 6. Zenko, Z., & **Ekkekakis, P.** (2017, June). *Measuring implicit exercise associations: Comparative validation*. Paper presented at the annual conference of the North American Society for the Psychology of Sport and Physical Activity. San Diego, California.
 7. Ladwig, M.A., & **Ekkekakis, P.** (2017, June). *Are physical education experiences associated with physical activity attitudes and intentions in adulthood?* Paper presented at the annual conference of the North American Society for the Psychology of Sport and Physical Activity. San Diego, California.
 8. Zenko, Z., & **Ekkekakis, P.** (2017, May). *Relation between affective valence during exercise and exercise behavior*. Paper presented at the annual meeting of the American College of Sports Medicine. Denver, Colorado.
 9. Hartman, M.E., Dicks, N.D., **Ekkekakis, P.**, Kernozek, T.W., & Pettitt, R.W. (2017, May). *Affective responses during high-intensity exercise detect changes in W'*. Paper presented at the annual meeting of the American College of Sports Medicine. Denver, Colorado.
 10. **Ekkekakis, P.** (2015, July). *How does dissociation enhance affective responses to exercise? Shedding (near-infrared) light into the brain in search for answers*. Paper presented at the 14th European congress of sport psychology, European Federation of Sport Psychology, Bern, Switzerland.
 11. Jones, L., Karageorghis, C.I., Hutchinson, J.C., & **Ekkekakis, P.** (2015, July). *Emerging evidence on the combined influence of music and video during exercise*. Paper presented at the 14th European congress of sport psychology, European Federation of Sport Psychology, Bern, Switzerland.
 12. Vazou, S., Mischo, A.B., & **Ekkekakis, P.** (2015, July). *Psychologically informed fitness testing practice in schools: A field experiment*. Paper presented at the 14th European congress of sport psychology, European Federation of Sport Psychology, Bern, Switzerland.
 13. Mischo, A.B., Vazou, S., & **Ekkekakis, P.** (2015, June). *Traditional versus psychologically informed fitness testing in physical education: Affective outcomes*. Paper presented at the annual conference of the North American Society for the Psychology of Sport and Physical Activity. Portland, Oregon.
 14. Vazou, S., Mischo, A.B., & **Ekkekakis, P.** (2015, June). *Reimagining fitness testing in schools: Enjoyment, need satisfaction, and intention*. Paper presented at the annual

- conference of the North American Society for the Psychology of Sport and Physical Activity. Portland, Oregon.
15. Mischo, A.B., Vazou, S., & **Ekkekakis, P.** (2015, May). *Self-evaluative and motivational implications of fitness testing at schools: A systematic review*. Paper presented at the annual meeting of the American College of Sports Medicine. San Diego, California.
 16. Zenko, Z., **Ekkekakis, P.**, & Ariely, D. (2015, May). *Recalled and forecasted pleasure of exercise increases by ramping intensity down*. Paper presented at the annual meeting of the American College of Sports Medicine. San Diego, California.
 17. Zenko, Z., & **Ekkekakis, P.** (2015, April). *Buckling foundation? A violation of the assumption of rationality in exercise decision making*. Paper presented at the annual meeting of the Society of Behavioral Medicine. San Antonio, Texas.
 18. Zenko, Z., & **Ekkekakis, P.** (2014, November). *Questioning the basic assumption behind current exercise promotion efforts: Do people make exercise choices rationally?* Paper presented at the annual meeting of the Midwest Regional Chapter of the American College of Sports Medicine. Merrillville, Indiana.
 19. Jones, L., Karageorghis, C.I., **Ekkekakis, P.**, & Bishop, D.T. (2014, November). *Psychological and psychophysiological effects of music and video during exercise*. Paper presented at the annual conference of the British Association of Sport and Exercise Sciences. Burton-Upon-Trent, United Kingdom.
 20. Jones, L., Karageorghis, C.I., & **Ekkekakis, P.** (2014, July). *Psychological and psychophysiological effects of music and video during exercise*. Paper presented at the 28th International Congress of Applied Psychology. Paris, France.
 21. **Ekkekakis, P.** (2014, June). *How does dissociation enhance affective responses to exercise? Insights from prefrontal hemodynamics*. Paper presented at the annual conference of the North American Society for the Psychology of Sport and Physical Activity. Minneapolis, Minnesota.
 22. Zenko, Z., & **Ekkekakis, P.** (2014, May). *Do health and fitness professionals know the American College of Sports Medicine's exercise prescription guidelines?* Paper presented at the annual meeting of the American College of Sports Medicine. Orlando, Florida.
 23. **Ekkekakis, P.** (2014, May). *Knowledge of exercise prescription guidelines across a four-year kinesiology curriculum: Implications for evidence-based practice*. Paper presented at the annual meeting of the International Society for Behavioral Nutrition and Physical Activity. San Diego, California.
 24. Tempest, G.D., Parfitt, G., & **Ekkekakis, P.** (2013, November). *Insight into the neural basis of why we feel how we feel during exercise*. Paper presented at the 23rd Annual meeting of the Australasian Society for Psychophysiology. Wollongong, Australia.
 25. Mackenzie, M.J., Carlson, L.E., Paskevich, D.M., **Ekkekakis, P.**, Wurz, A.J., Wytsma, K., Krenz, K.A., & Culos-Reed, S.N. (2013, June). *Associations between affect, attention and heart rate variability in a single yoga session for cancer survivors: A neurophenomenological approach*. Paper presented at the Mind and Life Summer Research Institute. Garrison, New York.

26. Decker, E.S., & **Ekkekakis, P.** (2012, May). *Can public health take the HIT? High-intensity interval training and affect in obese women.* Paper presented at the annual meeting of the American College of Sports Medicine. San Francisco, California.
27. Welch, A.S., **Ekkekakis, P.**, Decker, E., SoundaraPandian, S., & Werstein, K.M. (2012, April). *Peak affective exercise experiences predict future exercise decisions of overweight and obese adults.* Paper presented at the annual meeting of the Society for Behavioral Medicine. New Orleans, Louisiana.
28. **Ekkekakis, P.**, & Decker, E.S. (2011, July). *Can public health take the HIT? Impact of high-intensity interval training on affect in obese inactive women.* Paper presented at the conference of the European Federation for the Psychology of Sport and Physical Activity. Madeira, Portugal.
29. Vazou, S., & **Ekkekakis, P.** (2011, July). *Manipulating autonomy during exercise in inactive women: Impact on affective responses.* Paper presented at the conference of the European Federation for the Psychology of Sport and Physical Activity. Madeira, Portugal.
30. Tempest, G., **Ekkekakis, P.**, Broomfield, C., Drewell, L., & Parfitt, G. (2011, July). *Cerebral asymmetry during exercise using near infrared spectroscopy: An examination of self-reported tolerance.* Paper presented at the annual conference of the European College of Sport Science. Liverpool, United Kingdom.
31. Werstein, K.M., **Ekkekakis, P.**, & Welch, A.S. (2011, May). *Tackling the challenge of exercise avoidance among overweight and obese adults: Does the pleasure experienced during exercise play a role?* Paper presented at the symposium entitled "Origins of obesity: Maternal, epigenetic and lifestyle factors." Nutrition and Wellness Research Center, Iowa State University, Ames, Iowa.
32. Welch, A.S., **Ekkekakis, P.**, & SoundaraPandian, S. (2011, May). *Does adding a low-intensity, positive end to exercise impact future exercise choice of overweight inexperienced exercisers? Implications for exercise prescription.* Paper presented at the symposium entitled "Origins of obesity: Maternal, epigenetic and lifestyle factors." Nutrition and Wellness Research Center, Iowa State University, Ames, Iowa.
33. Lind, E., Welch, A.S., & **Ekkekakis, P.** (2011, June). *Attentional association-dissociation and post-exercise affect and enjoyment.* Paper presented at the annual conference of the American College of Sports Medicine. Denver, Colorado.
34. Franke, W.D., Kohut, M.L., Russell, D.W., Yoo, H.L., & **Ekkekakis, P.** (2010, June). *Is job-related stress the link between cardiovascular disease and the law enforcement profession?* Paper presented at the annual conference of the American College of Sports Medicine. Baltimore, Maryland.
35. SoundaraPandian, S., **Ekkekakis, P.**, & Welch, A.S. (2010, June). *Exercise as an affective experience: Does adding a positive end impact future exercise choice?* Paper presented at the annual conference of the American College of Sports Medicine. Baltimore, Maryland.
36. Lind, E., Welch, A.S., & **Ekkekakis, P.** (2010, June). *Influence of attentional association and dissociation on affective responses during incremental cycling ergometry.* Paper presented at the annual conference of the American College of Sports Medicine. Baltimore,

- Maryland.
37. Hall, E.E., **Ekkekakis, P.**, & Petruzzello, S.J. (2008, October). *Predicting affective responses using resting frontal EEG asymmetry: Does exercise intensity matter?* Paper presented at the annual meeting of the Society for Psychophysiological Research. Austin, Texas.
 38. Smiley-Oyen, A.L., **Ekkekakis, P.**, Lowry, K., Francoise, S., & Kohut, M. (2008, June). *Exercise, fitness, and neurocognitive function in older adults: The "selective improvement" and "cardiovascular fitness" hypotheses.* Paper presented at the annual meeting of the North American Society for the Psychology of Sport and Physical Activity. Niagara Falls, Ontario.
 39. Lind, E., **Ekkekakis, P.**, & Backhouse, S.H. (2008, May). *Role for core temperature in affective responses to strenuous exercise in obesity.* Paper presented at the annual conference of the American College of Sports Medicine. Indianapolis, Indiana.
 40. Welch, A.S., **Ekkekakis, P.**, & Lind, E. (2008, May). *Investigating prefrontal cortical dynamics during exercise using near-infrared spectroscopy (NIRS).* Paper presented at the annual conference of the American College of Sports Medicine. Indianapolis, Indiana.
 41. Backhouse, S.H., **Ekkekakis, P.**, Biddle, S.J.H., & Williams, C. (2007, September). *The exercise-affect relationship: A measurement and methodological analysis.* Paper presented at the 12th European Congress of Sport Psychology. Halkidiki, Greece.
 42. Holmes, M. E., Eisenmann, J. C., **Ekkekakis, P.**, & Gentile, D. (2007, June). *Physical activity, stress and the metabolic syndrome in 8-18 yr old boys.* Paper presented at the annual meeting of the American College of Sports Medicine. New Orleans, Louisiana.
 43. **Ekkekakis, P.** (2006, October). *Exercise as stress: Pleasure as a window into a possible dual-route control model.* Paper presented at the annual meeting of the Society for Psychophysiological Research. Vancouver, British Columbia.
 44. Backhouse, S.H., Bishop, N.C., Biddle, S.J.H., Williams, C., & **Ekkekakis, P.** (2006, June). *Caffeine ingestion prior to prolonged cycling can enhance positive affect and reduce perceived exertion.* Paper presented at the annual meeting of the American College of Sports Medicine. Denver, Colorado.
 45. Kamel, K.S., **Ekkekakis, P.**, & Sharp, R.L. (2006, June). *Salivary cortisol and affective changes during a swimming training program.* Paper presented at the annual meeting of the American College of Sports Medicine. Denver, Colorado.
 46. Eisenmann, J.C., **Ekkekakis, P.**, & Holmes, M.E. (2005, October). *Sleep duration, overweight, and waist circumference in 7-15 year old youth.* Paper presented at the annual scientific meeting of the North American Association for the Study of Obesity. Vancouver, British Columbia.
 47. **Ekkekakis, P.**, & Lind, E. (2005, August). *The dual-mode model of affective responses to exercise of varying intensities: A new perspective on the dose-response relationship.* Paper presented at the 11th World Congress of Sport Psychology. Sydney, Australia.
 48. Hall, E.E., **Ekkekakis, P.**, & Petruzzello, S.J. (2005, August). *Is the role of cognitive factors in exercise responses intensity-dependent? Extending the dual-mode model to perceived exertion.* Paper presented at the 11th World Congress of Sport Psychology. Sydney, Australia.

49. Lind, E., & **Ekkekakis, P.** (2005, June). *Interindividual variation in exertion ratings: Do dispositional constructs play a role?* Paper presented at the annual meeting of the North American Society for the Psychology of Sport and Physical Activity. St Pete's Beach, Florida.
50. **Ekkekakis, P.** (2005, June). *Affective responses to acute exercise.* Symposium paper presented at the annual meeting of the American College of Sports Medicine. Nashville, Tennessee.
51. Lind, E., **Ekkekakis, P.**, Hall, E.E., & Petruzzello, S.J. (2005, June). *Comparison of computerized methods for determining the gas exchange threshold.* Paper presented at the annual meeting of the American College of Sports Medicine. Nashville, Tennessee.
52. Kohut, M.L., Senchina, D., Konopka, D., Lee, W., Martin, A., Russell, D., Franke, W., & **Ekkekakis, P.** (2005, June). *Do psychosocial factors contribute to the exercise-induced alterations of influenza immunity and inflammatory mediators?* Paper presented at the annual meeting of the American College of Sports Medicine. APPENDIX: CITATIONS IN THE LITERATURE

"One area that has advanced greatly is our understanding of emotions and affect during exercise. Following an overview of the models and measures of affect, we focus on the extensive research of Ekkekakis and colleagues, who have continued to advance our understanding of exercise and affect" (Gill, Williams, & Reifsteck, 2017, p. 172).

"The circumplex model dominates research on physical activity and affect, and Ekkekakis is the leading researcher in that area. The model and related measures that can be used to monitor affect over time have contributed greatly to our understanding of physical activity and affect. People often report feeling better after exercise, but simply measuring affect after exercise misses the affect changes during exercise that can greatly influence physical activity behavior" (Gill, Williams, & Reifsteck, 2017, p. 173).

"Following classic attempts to understand the relationship between body and mind (e.g., James, Cannon), and more recent attempts to understand the relationship between brain and mind (e.g., Davidson, LeDoux), the author's research, like Damasio's, may contribute to our understanding of the relationships among body, brain, and mind" (Anonymous reviewer of the first manuscript describing my Dual-Mode Theory, in *Cognition and Emotion*, Ekkekakis, 2003).

"The topic of exercise and 'mental health' is not new but authors have used a plethora of methods and terminology that make the field less than coherent and, at times, difficult to review. Ekkekakis and Petruzzello have provided an in-depth and critical analysis of such issues and returned to sound theoretical and methodological principles in critiquing the field and making recommendations for measuring affect in exercise research. They have been very thorough in documenting their arguments" (Biddle, 2000, p. 69).

"Ekkekakis and Petruzzello (1999, 2002) offer the most extensive conceptual work on emotion in sport and exercise psychology and their circumplex model of affect is a useful base for research on physical activity and emotion" (Gill & Williams, 2008, p. 168).

"In his keynote address to the XIth European Congress of Sport Psychology, Ekkekakis (2003; Ekkekakis, Hall, & Petruzzello, 2005) described a new theoretical framework from which to develop a deeper understanding of the affective responses to acute exercise. He proposed the dual-mode model. With a basis in evolutionary theory, affective neuroscience and the adaptational implications of different exercise intensities, the model overcomes major limitations previously identified within the study of affective responses to exercise (Ekkekakis & Petruzzello, 1999). As a result, this theoretical framework has provided greater conceptual and theoretical clarity and offers a platform from which to base future research into the exercise-affect relationship" (Rose & Parfitt, 2005, *ISSP Proceedings*).

"The sixth chapter is written by a Greek researcher now active in the USA, Panteleimon

Ekkekakis, and is based on his 'Biddle Young Scholar Lecture on Exercise Psychology' at the conference. In my mind one of the most impressive talks of the conference, I was no less impressed by his chapter. ... In sum, Ekkekakis' impressive knowledge of exercise physiology and evolutionary factors has led to a very convincing exercise psychology of exercise-induced affect. Anybody with an interest in variables such as mood, exercise adherence, exercise on prescription, and the exercise intensities at which psychological interventions may be useful ought to read this chapter" (Nordin, 2005; Review of the book "*New Approaches to Sport and Exercise Psychology*," idrottsforum.org).

"Ekkekakis (2003) recently proposed the dual-mode model, which, arguably, brings greater conceptual and theoretical clarity to understanding the exercise-affect relationship and provides a solid platform from which further research can develop" (Rose & Parfitt, 2007, p. 282).

"Ekkekakis and colleagues (Ekkekakis, 2003; Ekkekakis et al., 2005; Ekkekakis & Petruzzello, 2000, 2002) have provided a number of critical insights over the past several years that have laid the groundwork for examination of the proposed exercise-affect-adherence relationship" (Williams, 2008, p. 472).

"Contemporary conceptually driven models integrating physical activity, neurobiological structures, cognitive functions, and emotional reactivity have stimulated research on the impact of even low-intensity or dose activity on emotional states (Ekkekakis & Acevedo, 2006)" (Salmon & Jablonski, 2010, p. 251).

"The characteristics of exercise itself pose some key barriers to regular and effective exercise participation for obese individuals. Indeed, given the amount of activity required for these individuals, these barriers may prove to be some of the most significant -- but also potentially some of the most addressable. Exercise psychology research has greatly informed our understanding of these factors, and places the profession at a critical position in being able to guide practice and develop understanding of these issues. A body of research directed by Panteleimon Ekkekakis has shed light on the conundrum associated with the largely held wisdom that exercise makes you feel good -- even though few actually do exercise" (Marchant, 2011, pp. 20-21).

INFLUENCE ON POLICY AND GUIDELINE DOCUMENTS

National Aging Research Institute. (2006). *National physical activity recommendations for older Australians: Discussion document*. Canberra: Australian Government Department of Health and Ageing.

P. 64: This evidence has guided the change in the message promoted by many physical activity guidelines, including the Australian National Physical Activity Guidelines (Department of Health and Aged Care 1999), that advocate individuals to accumulate at least 30 minutes of moderate-intensity physical activity throughout the day. This approach also reflects an attempt to make physical activity adoption more palatable in order to engage the most sedentary population groups, including older people, who have the most to gain from small changes to their lifestyle (Ekkekakis & Petruzzello, 1999).

Department of Health, Physical Activity, Health Improvement and Prevention (2004). *At least five a week: Evidence on the impact of physical activity and its relationship to health. A report from the Chief Medical Officer*. London: Department of Health.

P. 62: Required levels of physical activity / Amount: Evidence is strongest for bouts of moderate intensity activity which last between 20 and 60 minutes. However, this may be because research has focused on formal exercise programmes as opposed to recreational and spontaneous activity. Short bouts (10-15 minutes) of moderate intensity walking have recently been shown to induce significant positive changes in mood in experimental studies (Ekkekakis, Hall, VanLanduyt, & Petruzzello, 2000).

American College of Sports Medicine. (2010). *ACSM's guidelines for exercise testing and prescription* (8th ed.). Philadelphia, PA: Lippincott Williams & Wilkins.

P. 181: Perceived exertion using either RPE or the OMNI scales is recommended as either a primary or adjunct measure of exercise intensity. The talk test and measures of affective valence (Ekkekakis, Hall, & Petruzzello, 2004) such as the Feeling Scale may also be useful measures of perceived exertion; however, further research is needed before they can be recommended as primary tools for the estimation of exercise intensity. For this reason, the talk test and affective valence are recommended as adjunct measures of exercise intensity.

American College of Sports Medicine and American Diabetes Association. (2010). Exercise and Type 2 Diabetes: Joint position statement. *Medicine and Science in Sports and Exercise*, 42 (12), 2282-2303. Also in: *Diabetes Care*, 33 (12), e147-e167.

Pp. 2294-2295: Practitioners are encouraged to use factors such as choice and enjoyment in helping determine specifically how an individual would meet recommended participation. Affective responses to exercise may be important predictors of adoption and maintenance, and encouraging activity at intensities below the ventilatory threshold may be most beneficial (Lind, **Ekkekakis**, & Vazou, 2008).

American College of Sports Medicine. (2011). Quantity and quality of exercise for developing and maintaining cardiorespiratory, musculoskeletal, and neuromotor fitness in apparently healthy adults: Guidance for prescribing exercise. *Medicine and Science in Sports and Exercise*, 43 (7), 1334-1359.

P. 1344: Measures of the pleasantness/unpleasantness of exercise (i.e., affective valence) hold promise as a means to regulate and monitor exercise intensity because they can accurately identify the transition across the lactate threshold during cardiorespiratory exercise (**Ekkekakis**, Hall, & Petruzzello, 2004, 2008).

P. 1347: Individuals are somewhat more likely to adhere to moderate intensity compared with vigorous-intensity exercise. This effect may be moderated by previous exercise behavior so that individuals with previous exercise experience may respond more favorably to vigorous exercise, whereas habitually inactive people adopting exercise may be better suited to -- and self-select -- moderate-intensity exercise (**Ekkekakis**, Hall, & Petruzzello, 2005).

P. 1347: More negative affect is reported when exercising above the ventilatory threshold (**Ekkekakis**, Hall, & Petruzzello, 2008). Thus, prescribing exercise at an intensity below the ventilatory threshold may enhance affective responses to exercise (Lind, **Ekkekakis**, & Vazou, 2008) and improve exercise adherence and/or maintenance.

American College of Sports Medicine (2013). *ACSM's guidelines for exercise testing and prescription* (9th ed.). Philadelphia, PA: Lippincott Williams & Wilkins.

Pp. 374-375: A long-held belief is that feelings of fatigue and negative affect often accompany the initiation of physical activity programs and can act as a deterrent to continued participation. Therefore, any strategies that can be adapted to change these negative feelings may improve exercise adherence. As a result, many have advocated for novice exercisers to engage in cognitive-strategy techniques that decrease discomfort or improve positive affect (Lind, Welch, & **Ekkekakis**, 2009). For example, exercisers can engage in dissociation strategies that encourage the individual to block out feelings associated with exertion such as fatigue, sweating, or discomfort, usually by focusing on positive thoughts and enjoyment. In contrast are association strategies where the exerciser focuses on bodily sensations such as respiration, temperature, and fatigue. At light-to-moderate intensities of exercise (i.e., below ventilatory threshold), dissociation techniques may be beneficial to reducing perceptions of

effort and increasing affect. However, at higher intensities (i.e., above ventilatory threshold), physiologic cues likely dominate, and therefore dissociation strategies are less effective as individuals cannot "block out" the physiologic stimuli (Lind, Welch, & Ekkekakis, 2009). Association techniques may be helpful for the individuals to regulate exercise intensity to avoid potential injury or overexertion. Therefore, both association and dissociation strategies may be important for health/fitness and clinical exercise professionals to understand and use. They also have been shown to have some use in enhancing feelings associated with exercise and increasing exercise behavior (Lind, Welch, & Ekkekakis, 2009).

P. 375: Affective responses are more negative when exercise intensity is greater than ventilatory threshold (Hall, Ekkekakis, & Petruzzello, 2002). As a result, it has been proposed that self-ratings of affective valence and ratings of pleasantness/unpleasantness of an experience can be used as a marker of the transition from aerobic to anaerobic metabolism and may be useful for Ex R_x (Ekkekakis, Thome, Petruzzello, & Hall, 2008). Specifically, exercisers can use feelings of increasing displeasure to be a sign exercise intensity may be too high and they should decrease exercise intensity to reduce these feelings.

Pp. 377-378: Individuals with obesity may have had negative mastery experiences with exercise in the past and will need to enhance their self-efficacy so that they will believe they can successfully exercise. They may also be quite deconditioned and perceive even moderate intensity exercise as challenging so that keeping activities fun and at low enough intensity that they feel positive may be particularly important (Ekkekakis & Lind, 2006).

Guiraud, T., Labrunee, M., Gayda, M., Juneau, M., & Gremeaux, V. (2012). Non-pharmacological strategies in cardiovascular prevention: 2011 highlights. *Annals of Physical and Rehabilitation Medicine*, 55 (5), 342-374.

P. 357: As regards exercise prescription, the recommendations of the American College of Sports Medicine (ACSM) employ a somewhat limited model that may be considered incomplete insofar as it takes into account only two considerations, namely maximized efficiency (improved physical aptitudes and/or health) and minimized risks (myocardial damage, muscle and bone injuries). A connection between physical activity compliance and pleasurable exercise sessions has nonetheless over recent years been more and more convincingly shown to exist. It would consequently appear necessary to reconsider the ACSM model by incorporating the notion of pleasure and thereby combating patient non-compliance subsequent to a cardiovascular rehabilitation program. As is quite cogently explained in two review articles by Ekkekakis et al. (Ekkekakis, 2009; Ekkekakis, Parfitt, & Petruzzello, 2011), a prescription for physical activity must evidently be effective and risk-free, and yet the main goal for therapists should be to seek out compliance while at the same time instigating pleasurable changes of life style. It would seem that the risk-benefit-pleasure triangle may be

modified by exercise parameters (intensity, duration and frequency) in accordance with session supervision level, disease history, the social context, self-care skills and the stage reached in the rehabilitation program.

Mental Health Foundation (2013). *Let's get physical: The impact of physical activity on wellbeing*. London: Author.

An earlier study found that walking for 10-15 minutes was sufficient to have an impact on mood states (Ekkekakis, Hall, VanLanduyt, & Petruzzello, 2000). Participants rated their energy levels and pleasant feelings as higher whilst walking compared to beforehand. Following a 10-15 minute period of rest, participants' moods returned towards calmness and relaxation. These findings are encouraging as they suggest physical activity could be used as a strategy to regulate mood during the day; walking is practical to do in short bursts, available to most people and free. Allowing people to choose their preferred physical activity intensity seems to lead to more favourable changes in positive mood than imposed intensity physical activity (e.g. walking at one's own pace rather than walking at the pace set by an exercise instructor; Ekkekakis, Parfitt, & Petruzzello, 2011).

Institute of Medicine of the National Academies. (2011). *Early childhood obesity prevention policies*. Washington, DC: The National Academies Press.

P. 6-1: Mounting epidemiologic evidence indicates that short duration of sleep is a risk factor for obesity, type 2 diabetes, coronary heart disease, hypertension, and all-cause mortality in adults, independent of other measured risk factors. A similar inverse association between sleep duration and obesity has been observed in cross-sectional studies of older children and adolescents (Eisenmann, Ekkekakis, & Holmes, 2006).

Ministère de la Santé et des Solidarités. (2006). *Rapport sur le theme du sommeil*. Paris: Author.

P. 211: Le manque de sommeil contribue-t-il à l'épidémie d'obésité qui touche notamment les jeunes des sociétés post-industrielles? La relation entre sommeil de courte durée et obésité est bien documentée par de nombreuses études épidémiologiques transversales, mais aussi longitudinales, chez l'adulte et chez l'enfant ou l'adolescent, réalisées en France et dans d'autres pays, notamment aux Etats-Unis (Eisenmann, Ekkekakis, & Holmes, 2006).

Jeffrey, K., Mahony, S., Michaelson, J., & Abdallah, S. (2014). *Well-being at work: A review of the literature*. London: The New Economics Foundation.

pp. 17-18: In 2005, a review by Biddle and **Ekkekakis** summarised the evidence to date on the relationship between physical activity and well-being. The evidence on the positive impact of bouts of physical activity on mood is described as "remarkably robust". Several theories have been put forward for explaining this impact, including the ideas that exercise increases a sense of self-efficacy, that it provides a distraction from daily life, and that it often provides opportunities for social interaction. Physiologically, physical activity has been found to lead to the release of neurotransmitters such as serotonin and endorphins that are associated with positive mood. The review also brought together evidence that regular physical activity reduces anxiety and depression, as well as improving mood.

Algan, Y., Beasley, E., Guyot, F., Higa, K., Murtin, F., & Senik, C. (2016). *Big data measures of well-being: Evidence from a Google well-being index in the United States*. OECD Statistics Working Papers. Paris, France: OECD Publishing.

p. 21: Healthy habits, notably physical exercise, are associated with less depression and anxiety and improved mood (Biddle and **Ekkekakis**, 2005).
